

Collapsible Roof Mount Mast

CWS Data Bulletin

Catalog Number: 88018

This collapsible mast assembly is designed to be permanently mounted on a flat surface and folded away into the stored position. With no internal space required for storage, this pole assembly will work anywhere side mounting or internal compartment mounting is not an option. Applications include roofs of utility vehicles or trailers, tops of skid units, or even mobile generator trailers.

Features

- One person setup in less than a minute
- Collapsed height of 5.5"
- Stable in high winds
- Standard with up indicator, locking brackets, and no-mar stops

Specifications

Footprint: 7.5" x 42"

Collapsed height: 5.5"

Extended height: 70"

Note: The meteorological sensor module should be stored securely unless in use. If the vehicle does not have built-in storage for the sensor module, consider Accessory Catalog Number 88173: Protective Case for Vehicle-Mount Sensors.

Collapsible Roof Mount Mast shown extended with Magellan sensor module.
